

# The Cavaglia Glacier Garden

Complete documentation of the website: [www.ghiacciai.info](http://www.ghiacciai.info)

## Nature trails

### Footpaths and itineraries to and from Cavaglia

The sunny Poschiavo valley is located south of the Graubünden Alps. From the glaciers of the Bernina area, crossing a very varied vegetation, after only 25 km it reaches the Valtellina vineyards.

The Valposchiavo valley is an unique excursion area, thanks to its varied topography and a network of well marked footpaths. The waters of its streams are clear and the air is pure. Nature is still uncontaminated and there are many woods and lakes. The climate is mild from May to October. A trip on the Bernina Express (the Little Red Train), with views on Piz Bernina and Piz Palü, is a unique experience.

Furthermore, the Poschiavo valley offers many culinary, cultural and architectural attractions.

Respect nature

By not picking flowers and plants found along your path and not leaving garbage around, you will contribute to protect nature and preserve it for those who will come after you.

Farmers will be grateful if you will avoid treading on fields and meadows, re-close fences and not disturb grazing animals.

Friends of wild fauna will be happy if you limit yourselves to observe it with care and keep your dogs on a leash or under close control.

Foresters would like you to take care of the woods, avoid dropping matches or cigarette butts, carefully extinguish your picnic fire and not to light any fire at all during the dry season.
